UNITED STATES PATENT OFFICE

CHARLES E. HEYER, OF CHICAGO, ILLINOIS, ASSIGNOR TO ARTHUR M. BARNHART, ALSON E. BARNHART, AND CHARLES E. SPINDLER, ALL OF SAME PLACE.

DESIGN FOR A FONT OF PRINTING-TYPE.

SPECIFICATION forming part of Design No. 12,804, dated March 14, 1882.

Application filed January 27, 1882. Term of patent 14 years.

To all whom it may concern:

Be it known that I, CHARLES E. HEYER, a citizen of the United States, residing at Chicago, county of Cook, and State of Illinois, have invented and produced a new and original Design for a Font of Printing-Types, of which the following is a specification, reference being had to the accompanying typographical illustration, forming a part hereof.

The design is an extended heavy-face, shaded, and of a so-called "Title" character. It consists of capitals, points, and figures, and one catch-word. The letter has a broad appearance, supporting the main strokes as well as the hair lines by a straight diagonal block like filling up in the corners of the letters, on top and bottom, terminating with a straight hair-line or cecipb. The letters generally are shaded with a hair-line on the right side and bottom.

The flags of the letters C, E, F, G, J, L, T, and Z have an inclined position, and the flags of letter S have an outward-inclined position. The letters A and H have a wedge-shaped cross-line, bent in, which extends through either

side of the letter. The diagonal main strokes of letters K, M, N, and R run to a point and through the other part (hair-line) of the letter. The bottom hair-line of letter O curves swelling toward the inside of the letter. The rounded bottom part of letter U points out on either side, and the rounded bottom part of letter J points out on the right side. The figures 1 and 4 have a pointing out on the right side of the top, and figure 7 has the same feature on the bottom. The catch-word "AND" is on a diagonal position, with the letter N having two straight short lines along the word, the line on the top running toward the left, and the line on the bottom running toward the right.

I claim and desire to secure by Letters Patent—

The design for a font of printing-types, as shown and described.

CHAS. E. HEYER.
