# UNITED STATES PATENT OFFICE.

WILLIAM W. JACKSON, OF PHILADELPHIA, PA., ASSIGNOR TO ARTHUR M. BARNHART AND ALSON E. BARNHART, BOTH OF CHICAGO, ILL.

## DESIGN FOR TYPE.

SPECIFICATION forming part of Design No. 17,130, dated February 22, 1867.

Application filed January 2, 1866. Serial No. 1-7,488. Term of patent 14 years.

*To all whom it may concern:*

Be it known that I, WILLIAM W. JACKSON, a citizen of the United States, residing in Philadelphia, county of Philadelphia, and State of Pennsylvania, have invented and produced a new and original Design for a Font of Printing-Types, of which the accompanying specimen or impression is an exact representation, and is made a part of this specification.

The character of the design is a heavy broad-face ornamented, ray-shade; and it consists of capitals, figures, dollar-mark, character &, and points.

The special features are the vertical, horizontal, diagonal, and curved lines, which are concave at one or both ends, terminating in sharp points. The center strokes in B P R are heavy, curve downward, and do not connect with the vertical lines on the ray-shading,

which is a series of fine lines curved, parallel, or waved on the right side and lower edge of the heavy-faced line and at a short distance therefrom, and following the configuration thereof, and thereby appearing as a reflection, so to speak, of the heavy lines.

I claim—

The design for a font of printing types, the character of which is a heavy broad-face, ornamented, ray-shade type, the horizontal, diagonal, vertical, and curved lines being concave at one or both ends, and a combination of the heavy with the fine shade lines, as described, and shown in the accompanying typographical illustration.

WM. W. JACKSON.
