

photo
typesetter[®]
typeface
directory

This one-line typeface directory

is your guide to the more than 1200 typefaces now available for Typositor Typography®. In the section from page 1 through 20 are the foundry designs, the original and exclusive VGC typefaces, and those reproduced from the distinguished T. J. Lyons Antique Type Collection—all arranged in alphabetical order. The section from page 21 through 30 shows the many handlettered designs available, arranged numerically by their film font designations.

Collections of typefaces are never complete. VGC is constantly adding new faces, including many developed exclusively for Photo Typositor® film fonts by leading designers throughout the world.

Typositor Typography is unique. The typefaces shown in this directory are just the starting points. As many as 2800 variations in size, slant and proportion can be obtained from a single font when used on the versatile Photo Typositor. Characters can be bounced, staggered, overlapped, stepped up or down, screened, or produced with shadow effects. They can be backslanted, italicized, and optically modified (holding one dimension while changing the other, for example). All these variations are at your finger-tips, from a desk-sized unit that operates in full room light: the VGC Photo Typositor.

For composition in many languages, VGC film fonts are also produced in Interfont™ versions, an exclusive VGC system. See page 31 for full information.

**VGC® Interfonts
 permit composition
 in 15 languages**

An exclusive VGC development in film fonts is the Interfont—a standard font with added accents, symbols and diphthongs which let you set type in any of fifteen languages:

English	Swedish	Hungarian
French	Danish	Croatian
German	Norwegian	Albanian
Spanish	Finnish	Turkish
Italian	Portuguese	Welsh

More than 260 typefaces in the VGC film font library are available in Interfont versions. All new typefaces introduced by VGC are being produced simultaneously in Interfonts; and any faces in the current VGC Photo Typesetter® Typeface Catalog that have not yet been made available in Interfont versions can be supplied in that configuration upon request. A typical VGC Interfont is shown below.

VGC INTERFONTS™

This is a numerical listing of typefaces currently* available in Interfont versions. Interfont numbers are the same as those for standard fonts, prefixed by the letter "I" (for example, ITA-3 is the Interfont version of TA-3, Americana). New Interfonts are constantly being added. If you do not find the typeface you need in this list, please contact your source for Photo Typesetter composition or your VGC regional office or dealer.
