UNITED STATES PATENT OFFICE.

WILLIAM F. CAPTAIN, OF CHICAGO, ILLINOIS.

DESIGN FOR A FONT OF PRINTING-TYPE.

SPECIFICATION forming part of Design No. 16,102, dated May 26, 1885.

Application filed February 19, 1885. Term of patent $3\frac{1}{2}$ years.

To all whom it may concern:

Be it known that I, WILLIAM F. CAPTAIN, a citizen of the United States of America, residing at Chicago, in the county of Cook and State of Illinois, have invented and produced a new and original Design for a Font of Printing-Type, of which the following is a specification, reference being had therein to the accompanying printed specimens.

10 My invention relates to a new design for a font of printing-type; and it consists of italic letters inclined forward, formed of lines of equal thickness without serifs.

15 The cross-lines of the large letters A, H, and E are V shape, the lines of which extend from the angle upward to the right and left across the back and front lines of the letters. There are two forms of the capital letters A, H, M, and R and the lower-case letters h, m, and n. The top of each of the letters A and the bottom of the letters V W are formed of horizontal lines having angular connections with the sides of these letters. The front line

of one form of the large letters A, H, M, and R and of the lower-case letters h, m, and n are extended below the back and middle lines of these letters. 25

What I claim as new, and desire to secure by Letters Patent, is—

The design for a font of printing-type in which the letters incline forward, the middle lines of A, H, and E are V shape and extend across and beyond the side lines, the top line of A and the bottom lines of V W are horizontal and have angular connections with the sides, the front lines of one form of A, H, M, R, h, m, and n extend below the other portions of these letters, these and the other portions of the design being substantially as described and shown. 35 40

In testimony whereof I have affixed my signature in presence of two witnesses.

WILLIAM F. CAPTAIN.
